

Dear Parents,

During this week we'll cover the following topics:

Maths

Multiplying and dividing using 10, 100 and 1000.

Even and odd numbers.

Telling time using a.m. and p.m.

Science

What is a skeleton?

Quick reminder

On Wednesday a small science quiz on chapter 1.

Maths and Science study guide will be sent this week.

Kindly go through the multiplication time tables on a daily base.

For example they can go through the multiples of 3 today (3,6,9,12,15,18,21,24,27,30,33,36) then tomorrow 4 and so on. By time they'll feel very comfortable with their time tables. So, when long division is introduced they'll find it easy, as it's only few steps to follow to find the answer 😊

Mr. Hassan suggested an interesting site for maths games called Prodigy and it's for free! Stay tuned as more details will be sent on how we are going to use it 😊

Teacher: The child's third parent.
